DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

- I. Claims 29-34, 40, 47-61, 68 drawn to currency evaluation with means for flagging a bill,
- II. Claims 35-39, 76-83 drawn to currency evaluation with means for flagging a bill by halt of a transport mechanism,
- III. Claims 69-75 drawn to currency discriminating device with means for flagging a bill by use of electrical/electronics,
- IV. Claims 84 and 85 drawn to currency evaluation with means for flagging a bill by diverting it to a separate stacking bin.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims appear with respect to all claims to be generic.

NOTE: Since no figures are identified in the brief description of the drawings to be directed to the subject matter of the claims nor any alternative embodiments of same, applicant is required to identify the figures directed to each species and the corresponding locations in the specification of the instant invention and all of the parents where the species are supported.

NOTE: Since the contents of the instant application was obviously developed to support a number of applications, applicant is requested to withdraw the citation of documents that are not directed to the specific subject matter of the instant application. Also applicant is requested per page 600-123, column 1, paragraph 3 of the MPEP to

Art Unit: 3653

direct examiner to the specific column and line as well as figures that are relevant to the examination of the elected species.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Conclusion

2. Direct any inquiry concerning this or earlier communications from the examiner to Kenneth W. Bower at ken.bower@uspto.gov or (703) 306-4546. Call the examiner immediately prior to sending an unofficial fax to (703) 308-0552 or (703) 308-2571 if fax is busy.
